Laravel,

Codeigniter

Soft Skills

Analytical Thinking

Time Management

Good Communication

LANGUAGES

English, Hindi

Profile

A dedicated full stack web developer with skills to craft engaging user interfaces and building robust server-side applications. Commitment to stay updated with the latest industry trends and deliver high-quality web applications that prioritize clean code practices and optimal performance.

Experience

PHP Developer Intern

Sep'2023-Oct'2023

VDoIT Technologies Limited

As a PHP Developer Intern, I acquired hands-on experience in web development through active engagement with PHP frameworks such as Laravel and CodeIgniter. I collaborated closely with senior developers on various client projects, contributing to the full development lifecycle—from requirements analysis to deployment. Successfully implementing specific features and functionalities, I demonstrated proficiency in troubleshooting and debugging, ensuring the delivery of high-quality, error-free applications. Additionally, I proactively pursued continuous learning, attending workshops and staying updated on the latest industry trends. Through effective communication and collaboration, I played a key role in maintaining code integrity, optimizing performance, and fostering a team-oriented work environment.

EDUCATION

B.tech. CSE

2021 - 2025

Sushant University, Gurugram

12th CBSE

2021

Summer Fields School, Dlf phase 1, Gurugram

10th CBSE

2019

Summer Fields School, Dlf phase 1, Gurugram

PROJECTS

Currency Converter — *Made using Vanilla JS and CSS*

A simple real time app which uses the current exchange rate to convert the specified currency symbols.

Weather App — *Made using Vanilla JS and CSS*

A responsive weather app which uses geolocation to show the current weather or can also be used to show the weather of any specific area searched.

E commerce website — *Made using PHP, MySQL and bootstrap*

A full stack e-commerce website which allows a user to login and buy any product. It also features an admin page which allows us to control all the products, brands, categories, users and purchases done.

Spotify Clone — *Made using Vite and Tailwind CSS*

A Spotify clone built using Vanilla Js, Vite and Tailwind CSS which uses the official Spotify API.

LaraGigs — *Made using Laravel and bootstrap*

A job searching website built using the framework of PHP, Laravel. It allows the user to make a job posting, which can be edited or deleted by the owner, and also search for any jobs. Here the search can be done on basis of description, title, place, skills. It also includes pagination for showing jobs.

CIBlog — *Made using CodeIgniter 3 and bootstrap*

A blog website made using the framework of PHP, CodeIgniter 3. Here new blog posts can be made which can then be edited or deleted by the owner only. It also includes pagination for the posts.
